

ns_flags::OptionParser
::getDefaultOptionInfo

ns_flags::OptionParser
::getOptionInfo

ns_flags::OptionParser
::getOptionArgv

```
graph LR; A[ns_flags::OptionParser::getDefaultOptionInfo] --> C[ns_flags::OptionParser::getOptionArgv]; B[ns_flags::OptionParser::getOptionInfo] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source functions on the left, 'ns_flags::OptionParser::getDefaultOptionInfo' and 'ns_flags::OptionParser::getOptionInfo', both have arrows pointing to a single target function on the right, 'ns_flags::OptionParser::getOptionArgv'. The target function box is shaded gray, while the source function boxes are white with black borders.
